3.3 Whirling Dervishes Show / Ceremony

It is not so far away from you being a guest of Mevlevi Dervishes' spiritual voyage while you are in Cappadocia. The hidden director of the ceremony is Mevlana Celaleddin-i Rumi (1207 - 1273) who had started the Mevlevi heritage and during the Sema Ceremony that consists of seven different chapters.

Watch in wonder this ceremony in Cappadocia, as the whirling dervishes take their place and praise the Prophet Mohammed. Following a chant, the extraordinary whirling dervishes revolve to represent the birth of humanity. With his hat (his ego's tombstone) and his white skirt (his ego's shroud) the dervish is spiritually born to the truth. When he removes his black cloak, he journeys and advances to the

spiritual maturity through the stages of the Sema. At the beginning and each stage of the Sema, holding his arms crosswise he testifies to God's unity.

It ends with Fâtiha for the souls of all Prophets, martyrs and believers, plus a prayer for the salvation of the country. Dating back centuries, the tradition represents in thrilling fashion the idea that in the universe, everything, from atoms to the solar system to the blood that circulates in the body will revolve. This show is performed in a Historical Caravansarai which is built in the 13th century.
